pulsenomics 2010 - 2011 CRYSTAL BALL AWARD WINNERS

Nariman Behravesh IHS Global Insight	#1 Ranking for 2-Year Horizon (2010-2011)
Paul Dales Capital Economics Ltd	Top 10 Ranking for 2010, 2011 and 2010-2011
Dan Greenhaus BTIG LLC	#1 Ranking for 1-Year Horizon (2011)
John McIlwain Urban Land Institute	Top 10 Ranking for 2010, 2011 and 2010-2011
Edward Pierzak Henderson Global Investors	#1 Ranking for 1-Year Horizon (2010); Top 10 Ranking for 2010, 2011 and 2010-2011
Edward Pinto American Enterprise Institute	Top 10 Ranking for 2010, 2011 and 2010-2011
Mark Zandi / Celia Chen Moody's Analytics	Top 5 Ranking for 2010, 2011 and 2010-2011

Ranking Eligibility:

For the 2010 1-Year Horizon and the 2010-2011 2-Year Horizon

Panelists who submitted home price expectations for each of the May, June, September and December editions of the survey in 2010 were considered. (The May 2010 edition of the survey was the inaugural installment, and it was conducted during a timeframe when the then latest available benchmark HPI data was a/o the preceding fourth quarter, the same reference data that would have been accessible by the panelists had the survey been conducted in March 2010).

For the 2011 1-Year Horizon

Panelists who submitted home price expectations for each of the March, June, September and December editions of the survey in 2011 were considered.

Ranking Methodology:

The home price expectations data submitted by all eligible panelists for each of the four survey editions examined in both 2010 and 2011 were compared to the actual (Q4/Q4) home price changes for three periods: 2010, 2011 and 2010-2011. The benchmark data used to determine the actual Q4/Q4 % changes for all three periods were the S&P/Case-Shiller U.S. National Home Price Index levels published on February 28, 2012 (the first publication date of the survey benchmark capturing market activity through Q4 2011).

For the 2010 1-Year Horizon

The sum of the absolute differences between (a) the expectations data submitted in each of the four 2010 surveys and (b) the actual (Q4 2010 / Q4 2009) change in the benchmark data was computed for each eligible panelist. These sums were then sorted in ascending order to generate rankings (i.e., the lowest sum represents the lowest average error/highest rank).

For the 2011 1-Year Horizon

The sum of the absolute differences between (a) the expectations data submitted in each of the four 2011 surveys and (b) the actual (Q4 2011 / Q4 2010) change in the benchmark data was computed for each eligible panelist. These sums were then sorted in ascending order to generate rankings (i.e., the lowest sum represents the lowest average error/highest rank).

For the 2010-2011 2-Year Horizon

The sum of the absolute differences between (a) the expectations data submitted in each of the four 2010 surveys and (b) the actual (Q4 2011 / Q4 2009) change in the benchmark data was computed for each eligible panelist. These sums were then sorted in ascending order to generate rankings (i.e., the lowest sum represents the lowest average error/highest rank).
