Moody's Analytics Launches Dismal Scientist for iPad

NEW YORK, March 20, 2012 – Moody's Analytics, a leading independent provider of economic data and analysis, today announced the launch of Dismal Scientist® for iPad® mobile digital device, a free application providing real-time information for more than 300 economic indicators in 46 countries. The app is a valuable tool for investors, analysts or anyone who needs to keep abreast of the fast-changing global economy.

“Our goal is to use technology to find more convenient and readily accessible ways for people to use our analysis,” says Paul Getman, Executive Director of Moody's Analytics Economic and Consumer Credit Analytics. “Dismal Scientist for iPad puts Moody's Analytics' trusted, timely and relevant economic analysis and data directly into the hands of capital markets participants to help them assess global risk.”

Dismal Scientist for iPad is updated frequently by Moody's Analytics forecasters in the US, Europe and Asia. The app offers users a sample of the much deeper and richer content found on the Moody's Analytics Dismal Scientist subscription-based website.

Dismal Scientist for iPad is available at www.economy.com/apps. You can also download it, by visiting the iTunes Store®.

iPad® and iTunes Store® are registered trademarks of Apple Inc.

About Moody's Analytics

Moody's Analytics helps capital markets and risk management professionals worldwide respond to an evolving marketplace with confidence. The company offers unique tools and best practices for measuring and managing risk through expertise and experience in credit analysis, economic research and financial risk management. By providing leading-edge software, advisory services and research, including the proprietary analysis of Moody's Investors Service, Moody's Analytics integrates and customizes its offerings to address specific business challenges. Moody's Analytics is a subsidiary of Moody's Corporation (NYSE: MCO), which reported revenue of \$2.3 billion in 2011, employs approximately 6,100 people worldwide and maintains a presence in 28 countries. Further information is available at www.moodysanalytics.com.
